A detailed architectural sketch showing a long, cantilevered balcony or overhang supported by a series of vertical columns. A dashed line indicates the projected path of the balcony slab, which cantilevers significantly beyond the columns. The sketch is done in a technical, hand-drawn style with fine lines and cross-hatching for shading.

IN APERTURA: DISEGNO DI STUDIO. IN QUESTE PAGINE: IL PROGETTO È PROCEDUTO NEL RISPETTO DELLE RESTRIZIONI IMPOSTE DALLA TUTELA DEGLI EDIFICI STORICI E DA QUELLA DEI GIARDINI. L'AMPLIAMENTO - NON SUPERIORE AL 30 PER CENTO DELLA SUPERFICIE ESISTENTE - POTÉVA AVVENIRE NELLA SOLA DIREZIONE LONGITUDINALE E IL VECCHIO CASTAGNO ADIACENTE DOVEVA ESSERE SALVAGUARDATO: L'ADDITIONE SI È QUINDI SVILUPPATA IN PIANTA SECONDO UN PRECISO SCHEMA DI GEOMETRIE OBLIQUE.

Succede che piccoli edifici, a prima vista fragili e provvisori, abbiano una lunga storia, cronologica e sociale. In un'area centrale di Zurigo, ai bordi di un isolato verde con grandi alberi di castagno, si scorge un padiglione in legno bianco, tranquillamente integrato al luogo. Molto svizzero come immagine, molto preciso come forma, insieme vecchio e nuovo: in un rapido film si ricostruisce la sua storia di manifatto, che va dalla solida tradizione costruttiva locale alle espressioni più recenti della rigorosa scuola di architettura zürighese.

Nato all'inizio del Novecento come struttura temporanea per ospitare aule scolastiche, in risposta all'incremento della domanda di spazi per la didattica, l'edificio è stato convertito nel 1984 in cinema d'essai con caffè annesso. In quel momento, l'operazione di riconversione è stata pragmaticamente risolta con pochi interventi solo interni, economici e funzionali: le aule, unite in successione, sono diventate la sala di

proiezione, mentre il corridoio della ex scuola si è trasformato in uno spazio di ristoro.

Più recentemente, l'esigenza di ampliare la caffetteria, rendendola anche fruibile separatamente dal cinema, ha richiesto un intervento più sostanziale. Barbara Frei e Martin Saarinen, giovani architetti diplomati all'ETH di Zurigo, hanno interpretato il programma con esattezza geometrica, aggiornandone a una estremità del corpo preesistente un elegante volume, dalla pianta irregolare e tutto tagliato - tetto metallico compreso - su linee diagonali. L'idea di allungare la nuova copertura sull'edificio storico e di adottare negli interni un regolare soffitto continuo risulta determinante per il valore di questo intervento a piccola scala. RC

OPENING PAGE: STUDY DRAWING. THESE PAGES: THE PROJECT RESPECTS THE RESTRAINTS IMPOSED BY THE PROTECTION OF THE HISTORIC BUILDINGS AND THE GARDENS. THE EXTENSION - NOT EXCEEDING 30 PER CENT OF THE EXISTING SURFACE - CAME ONLY ON ONE SIDE LENGTHWISE AND THE OLD CHESTNUT TREE NEXT TO IT HAD TO BE KEPT. THE ADDITION WAS THEREFORE DEVELOPED IN PLAN TO A PRECISE PATTERN OF OBLIQUE GEOMETRIES.

**A SMALL-SCALE PAVILION IN THE HEART OF ZURICH HAS BEEN ENLARGED AND INTERNALLY REDESIGNED WHILE MAINTAINING ITS ORIGINAL ARCHITECTURAL QUALITIES**

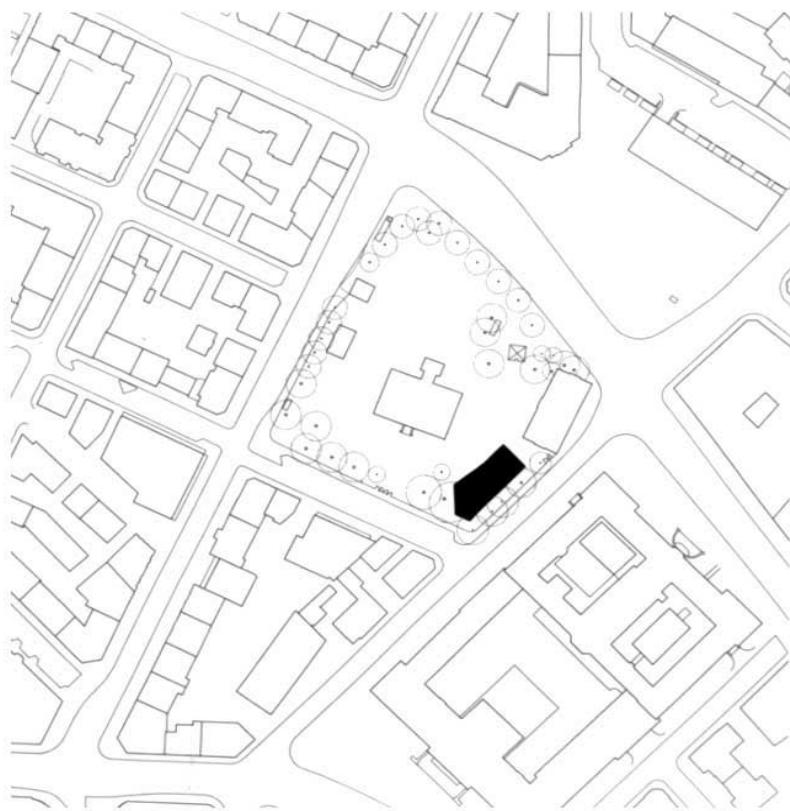

Sometimes, there are small, at first sight frail and temporary-looking buildings that happen to tell a long chronological and social story. In a central part of Zurich, on the edge of a green block with large chestnut trees, one catches sight of a white wooden pavilion calmly merged into its surroundings. Very Swiss in its image and very precise in its form, it is both old and new. Its history can be summarised in rapid frames reaching from a solid local building tradition to the most recent expressions of the rigorous Zurich school of architecture.

Erected at the beginning of the 20th century as a temporary structure to house classrooms in response to an increased demand for schools, the building was converted in 1984 into an experimental cinema with annexed cafe. At that time, the conversion project was pragmatically confined to a few inexpensive functional alterations to the inside of the building. The former succession of classrooms was joined together to make the cinema auditorium, while the ex-school corridor was turned into an eatery.

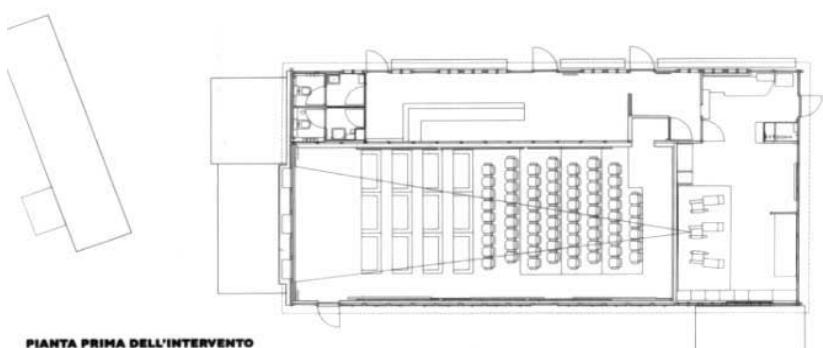

More recently, the need to enlarge the cafeteria and make it available separately from the cinema called for a more substantial new design. Barbara Frei and Martin Saarinen, young architects from Zurich's ETH, interpreted the brief with geometric exactitude. To one end of the existing body they added an elegant new volume with an irregular plan made up entirely – including the metal roof – of diagonal lines. The idea of lengthening the new roof of the original building and adopting a regular continuous ceiling for its interiors lends a decisive added value to this small-scale work. **RC**
